

Risk Assessment - Batak Game

The Batak game is a small inflatable game. It is a fast action game played by 2 players. Each player stands on the opposite side of the inflatable Batak wall. They have to try & push their blocks through while their opponent try's to push them back. The player with the least blocks striking out is the winner. The game is for accuracy and uses motor skills. The unit stands alone and participants don't jump or stand on the inflatable.

Name of Inflatable	Risk	Safety Measures	Likeleyhood	Severity	Risk	Extra safety measures
Batak	Over enthusiastic participants	Responsible person supervising at all times. Rocking from side to side is NOT PERMITTED UNDER ANY CIRCUMSTANCES.	1	1	2	In the event of large numbers participants a trained operator should be hired with the inflatable to aid with large numbers.
Batak	Jumping over unit	Responsible person supervising at all times.	1	1	1	In the event of large numbers participants a trained operator should be hired with the inflatable to aid with large numbers.

Batak	Adverse weather conditions.	Equipment to be switched off in heavy rain and is not permitted to be used in strong winds these conditions can be deemed a health and safety risk	Dependant on weather.	Dependant on weather.	Dependant on weather.	None
-------	-----------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------	-----------------------	-----------------------	-----------------------	------

Batak	Injury Through lack of supervision.	Constant supervision is required by a responsible adult.	1	5	5	None
Batak	Tripping over anchorage points, electrical equipment.	Anchor points used as per manufacturer's instructions and where possible electrical cables not to cross any public pathway.	1	1	1	In the event of a large event safety fencing to be erected and cables to be covered/overhead - by the organiser
Batak	Injury through incorrect positioning of equipment.	Do not move or try to reposition the inflatable under any circumstances and ensure that the anchors are in place at all times.	1	2	2	None

Risk Assessment - Batak

Batak	Petrol Blower/ Generator, Risk of fire	Provide a working fire extinguisher for fuel (petrol).	3	1	3	All spare fuel to be stored in suitable marked container. Inflatable switched off while refilling.
Batak	Injury through 3rd party items and 3rd party bodies.	Always ensure the area surrounding the inflatable is not overcrowded.	1	5	5	None
Batak	Danger of fire	No smoking or barbecues near the inflatable at any time	1	5	5	None
Batak	Emergency	In the event that someone is seriously injured. DO NOT move the individual, leave the inflatable switched on and dial 999 immediately.	1	5	5	None

Batak	Injury through insecure anchorage	Never use any unit without proper anchorage in place. It may be blown over in certain wind conditions. If the inflatable unit is not anchored correctly please ensure you tell a member of Splash Inflatables Ltd right away.	1	5	5	None
-------	-----------------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	---	---	---	------

L=Likelihood S=Severity L*S= Risk 1=Low 5=High

Risk is worked out using numbers 1 - 5. The likelihood is given a number and this is multiplied by the number given to the severity of the risk.

The result = the risk factor. This generic risk assessment is brief and we have our own individual assessments for each individual risk, 25 being the worst possible outcome, any item reaching 25 would give serious cause for concern & we would not be able to erect the unit. It is recommended that clients undertake their own risk assessment to suit their requirements.
